Precautions for Working Outdoors

The combination of heat and humidity can be a serious health threat when working outdoors. In addition to the temperature, you are more susceptible to heat stroke, heat exhaustion and sun poisoning when you are exposed to excessive amounts of sun. To beat the heat:

- Drink plenty of water before you get thirsty, but avoid beverages containing caffeine or alcohol.
- Wear light, loose-fitting, breathable clothing, such as items made of cotton.
- Eat smaller meals before work activity.
- Be aware that equipment such as respirators or work suits can increase heat stress.
- Wear sunblock of at least 15 SPF.
- Take breaks as needed in shaded or air conditioned areas.
