

Universal Pier Block

Introducing the **Universal Pier Block**.

This innovative new product actually enhances currently available technologies to accommodate virtually **every** type of dimensional lumber in the construction of decks. **Universal Pier Block** benefits both contractors and do-it-yourself consumers, is easy to use, and allows maximum design flexibility by allowing dimensional lumber to be used in a variety of combinations.

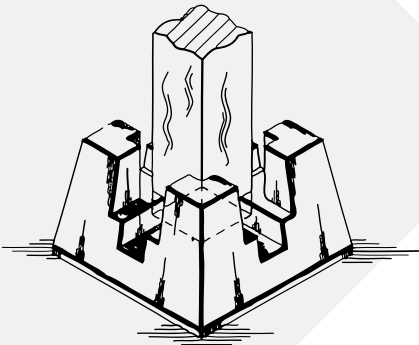

Universal Pier Block secures a post or the end of wooden or metal 4x4's, 6x6's or 2x6's with adjustable brackets. It also features a drain hole to ensure that moisture is moved away from the structure.

With this easy-to-use block, supporting different sizes of beams in an exact and stable position is simple. By eliminating the need for pier blocks of different sizes, you eliminate time consuming and costly errors.
